

Product Benefits

- Builds soil structure for better air and water movement
- Holds water in the root zone without waterlogging
- Keeps nutrients available instead of losing them to leaching
- Feeds and supports beneficial soil microbes
- Drives stronger root growth and establishment
- Helps plants handle stress more consistently

REVIVE Plus - BioChar + Biological Enhancers

ACTIVE INGREDIENTS:

Micronized Activated Softwood Biochar
(≤5 micron particle size)
Humate (derived from Leonardite)
Fish Hydrolysate, Kelp Extract, Yucca
Extract, Molasses, Water
Plus over 60 macro- & micro-nutrients.

Basic Dilution

**For most soil applications mix:
1–4 fl oz Revive Plus per gallon of water
Adjust dilution volume to match spray
equipment or irrigation volume.**

***Revive Plus is flexible, you may adjust rates
as needed**

AT THESE RATES,
A 2.5-GAL JUG (320 OZ)
COVERS APPROXIMATELY:

- 26,700–32,000 sq ft turf
- 80–320 ornamental plants
- 8–32 small trees (10" DBH)
- 4–16 medium trees (20" DBH)
- 2–10 large trees (30" DBH)

Shake container well before each use.

Do not allow to freeze. Do not swallow. Keep out of reach of children and pets. Residue at the bottom of the container is a natural occurrence and we have generously accounted for it.

Treatment Rates

Trees

Apply 1-4 fl oz Revive Plus per inch trunk diameter (DBH)

Dilution

Mix with 10–20 gallons water per tree
Apply evenly around the dripline or apply through soil injection around the root zone.

Ornamental Shrubs and Perennials

Apply 1-4 fl oz Revive Plus per plant

Dilution

Mix with 1–2 gallons water per plant
Apply as a soil drench around the root zone and water in thoroughly.

Turfgrass and Lawn

Apply 10–12 fl oz Revive Plus per 1,000 sq ft

Dilution

Mix with 5–10 gallons water per 1,000 sq ft
Apply evenly using backpack sprayer, pump sprayer, spray rig, or irrigation system. Deeply irrigate after application.
